# Product extension for the GEV universal control knob

## Universal control knob now applicable for more appliances!

### The problem:

Standard adapters are too short for some gas taps and thermostats. The universal control knob hits the front panel before releasing the gas.

### The solution:

For long spindles: spacers (CNS, 1mm)

For short spindles: adapters with extension piece (6mm)

Both solutions put the control knob further back and therefore enable the gas release.

**Standard adapter without extension piece**

Gas release is not possible because the control knob hits the front panel

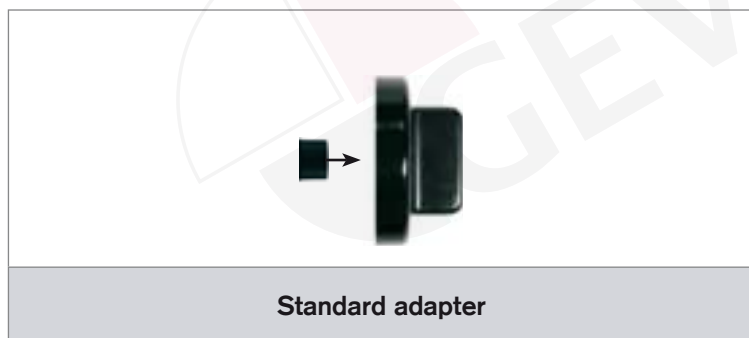

**Solution for long spindles: Standard adapter with spacers (CNS)**

Gas release enabled

**Solution for short spindles: Standard adapter with extension piece (6mm)**

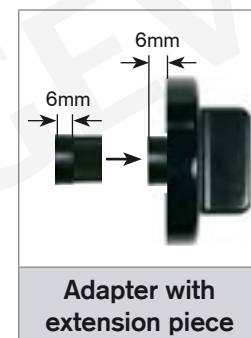

Gas release enabled
